

GIS DAY

November 14, 2018

Watershed Sandbox: An augmented reality sandbox, can be used to actively educate the public on concepts like topography, elevation and watersheds.

Everything Maps!

How agencies use stereo/3D mapping technology

Drones: how they allow us to quickly and efficiently get new aerial imagery and create 3D visualizations

Come out to learn about advancements in Geographic Information Systems in your local municipality & watershed.

Public welcome from 3:00 pm to 7:00 pm.

Hands-on compass and GPS activities

How is GIS Technology Used?
